

How to turn 1 sheet of paper into a 16-page zine

1

2 Fold the paper in half, short edge to short edge (hamburger fold)

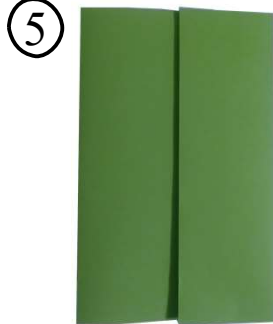

3

Open back up

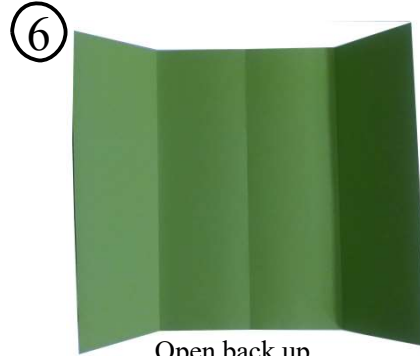

4

Fold right short side to the middle crease

5

Fold left short side to the middle crease

6

Open back up

7

Fold in half, long edge to long edge (hotdog fold)

8

Fold the long edge to the center crease

9

Flip the page over, the long way

10

Fold the long right edge to the middle crease

13

Dotted lines indicate where you will cut. Take note of where the cover will be and where the back cover will be.

11

Open up the paper, such that the middle crease is folded inward (creating a "valley") and the two creases on either side are folded outward (creating two "peaks")

12

Flatten the paper

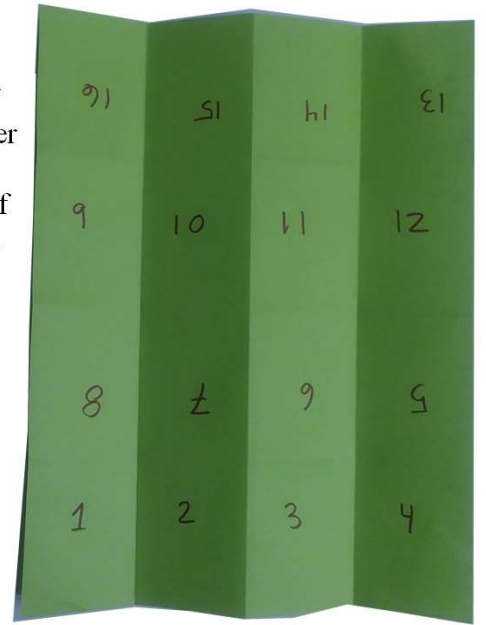

14 Flip the page back over

15

Take note of the page order and the orientation of the numbers.

16

Cut on the dotted lines

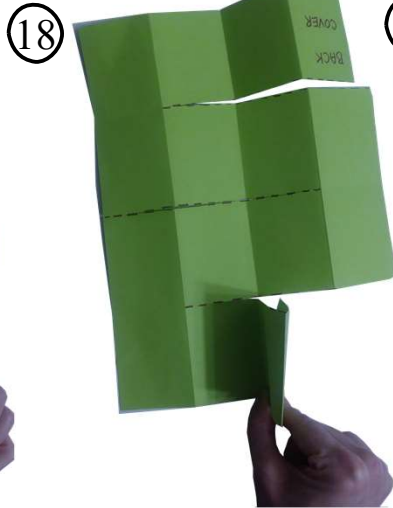

(I apologize for the creepy hands and fingers in the following images.)

You can either fill out your pages pre- or post-assembly!

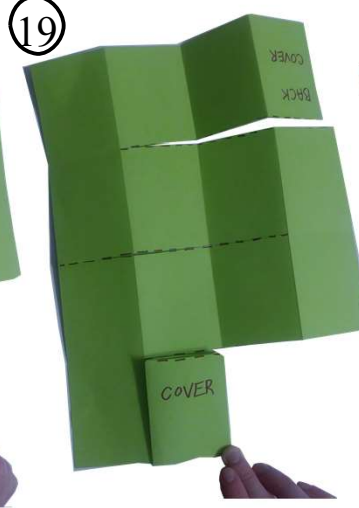

Fold according to the "peaks" and "valleys" of the folds.
